

MATHEMATICAL

Me, mathematical? Never!

Ability at school? Average.....

Theories? Pythagoras and Einstein I am not but I explore the

Hidden truths in the world and in life.

Equations and patterns unfold, the

Mathematical structures, the leaves on a stem and branching trees (Fibonacci's sequence)

And

Theorems that explore the universe, vast and great.

I am in a world where numbers abound and where

Curiosity awakens and sharpens the mind

And I, the mathematician, will gaze around and

Life, like sequences, are a never-ending wonder.
